COVID-19 INFORMATION

COVID-19 ALBERTA HEALTH DAILY CHECKLIST (FOR CHILDREN UNDER 18)

Overview

This checklist applies for all children, as well as all students who attend kindergarten through Grade 12, including high school students over 18. Children should be screened every day by completing this checklist before going to school, childcare or other activities. Children may need a parent or guardian to assist them to complete this screening tool.

If your child has traveled outside Canada in the last 14 days, follow the <u>Government of Canada Travel, Testing, Quarantine and Borders</u> instructions, including any requirements for exempt travelers related to attending high-risk environments. International travellers who become a case of COVID-19 after arrival in Alberta should follow isolation requirements outlined by the Government of Canada

If your child has received a message from Public Health indicating that they are a case⁴ of COVID-19 or if your child has tested positive on <u>a rapid test</u>, they are required to isolate as per <u>Public Health instructions</u>. For more information on isolation requirements after a positive rapid test, refer to the <u>Rapid Testing at Home website</u>.

Screening Questions for Children under 18:

ſ	1.	Has your child been a household contact of a case ⁴ of COVID-19 in the last 14 days?	YES	NO
		A household contact: a person who lives in the same residence as the case OR who has been in		
		frequent, long-duration, close-range interaction with a case of COVID-19. For example, someone who		
		slept over, attended a birthday party or someone who was a play date with a case.		

If child answered "YES" AND they are NOT fully immunized5:

 Child should stay home and NOT attend school, childcare and/or other activities for 14 days from the last day of exposure and monitor for symptoms

If child answered "YES" and they are fully immunized proceed to question 2:

If child answered "NO" to question 1, proceed to question 2

	., p			
2. Does the child have any new of	Does the child have any new onset (or worsening) of the following core symptoms:			
Fever		YES	NO	
Temperature of 38 degrees Cels	sius or higher			
Cough		YES	NO	
Continuous, more than usual, no	ot related to other known causes or conditions such as asthma			
Shortness of breath		YES	NO	
Continuous, unable to breathe of	leeply, not related to other known causes or conditions such as			
asthma				
Loss of sense of smell or tast	е	YES	NO	
Not related to other known caus	es or conditions like allergies or neurological disorders			

If the child answered "YES" to any symptom in question 2:

- If the child is fully immunized⁵ they are required to isolate for 5 days from onset of symptoms or until symptoms resolve³ whichever is longer. They must wear a mask for up to 5 days after their isolation period if you are outside of the home in a public place or otherwise in the company of other persons out of your household (no exceptions permitted) **OR**
- If they are NOT fully immunized⁵, they must isolate for 10 days from the onset of symptoms or until they resolve³ whichever is longer **OR**
- Until symptoms resolve³ if they receive a negative PCR COVID-19 test OR
- Until symptoms resolve³ if they receive two negative rapid antigen tests, with at least 24 hours between tests

⁵ A child who has received the complete vaccine series for COVID-19 and it has been 14 days after the second dose in a two dose series

³ Symptoms resolved means symptoms have improved and with no fever for 24 hours without the use of fever reducing medication

⁴ A lab-confirmed case OR a probable case as defined in the Alberta COVID-19 Notifiable Disease Guideline

 They can use an <u>at-home rapid test if available</u> or the <u>AHS Online Assessment Tool</u> or call Health Link 811 to arrange for testing and to receive additional information on isolation.

If the child answered "NO" to all of the symptoms in question 2, proceed to question 3.

3.	Does the child have any new onset (or worsening) of the following other symptoms:				
	Chills	YES	NO		
	Without fever, not related to being outside in cold weather				
	Sore throat/painful swallowing	YES	NO		
	Not related to other known causes/conditions, such as seasonal allergies or reflux				
	Runny nose/congestion	YES	NO		
	Not related to other known causes/conditions, such as seasonal allergies or being outside in cold weather				
	Feeling unwell/fatigued	YES	NO		
	Lack of energy, poor feeding in infants, not related to other known causes or conditions, such as				
	depression, insomnia, thyroid dysfunction or sudden injury				
	Nausea, vomiting and/or diarrhea	YES	NO		
	Not related to other known causes/conditions, such as anxiety, medication or irritable bowel syndrome				
	Unexplained loss of appetite	YES	NO		
	Not related to other known causes/conditions, such as anxiety or medication				
	Muscle/joint aches	YES	NO		
	Not related to other known causes/conditions, such as arthritis or injury				
	Headache	YES	NO		
	Not related to other known causes/conditions, such as tension-type headaches or chronic migraines				
	Conjunctivitis (commonly known as pink eye)	YES	NO		

If the child answered "YES" to ONE symptom in question 3:

- Keep your child home and monitor for 24 hours and consider giving child an <u>at-home rapid test</u>. If the test is positive or negative see below for further instructions.
- If <u>at-home rapid testing</u> is not done and the symptom is improving after 24 hours, your child can return to school and activities when they feel well enough to go.
- If the symptom **does not improve or worsens** after 24 hours (or if additional symptoms emerge), use an <u>at-home rapid test</u> if available or the AHS Online Assessment Tool or call Health Link 811 to check if testing is recommended.

If the child answered "YES" to TWO OR MORE symptoms in question 3:

- Keep your child home
- Use an <u>at-home rapid test</u> if available or use the <u>AHS Online Assessment Tool</u> or call Health Link 811 to determine if testing is recommended.

For at-home rapid testing result instructions for those without symptoms:

- If an <u>at-home rapid test</u> is done and is negative, they can return to school and activities as long as they remain asymptomatic.
- If at-home rapid test is positive, the child is required to isolate as outlined above for question 2.

If the child answered "NO" to all questions:

Your child may attend school, childcare and/or other activities

Please note: If your child is experiencing any symptoms from the lists above, do not bring them to visit a continuing care or acute care facility for 10 days from when symptoms started or until symptoms resolve (whichever is longer), unless they receive a negative PCR COVID-19 test result or two negative rapid test results at least 24 hours apart <u>and</u> feel better.
